

ANIL NEERUKONDA INSTITUTE OF TECHNOLOGY & SCIENCES

Autonomous Institution Affiliated to Andhra University | Approved by AICTE

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Course: Full Stack Web Development Lab

Observation Task: #04

Student Name: Manoj Bagadi

Roll No: 322126510001 (CSM)

1. TITLE OF THE EXPERIMENT

Interactive Todo List Web Application with DOM Manipulation & Event Handling

2. AIM

To build an interactive Todo List application in JavaScript allowing users to add tasks dynamically, toggle task completion with strikethrough styling, and remove tasks using DOM parent-child manipulation.

3. PROCEDURE / ALGORITHM

Step 1: Design a centered card layout containing an input field, 'Add' button, and an unordered list (<ul id='list'>).

Step 2: Implement addTask() function to capture and trim the user input.

Step 3: Dynamically create a list item () containing task text span and a 'Delete' button.

Step 4: Attach a click event listener on the span to toggle the .done class (text-decoration: line-through).

Step 5: Attach a click event listener on the delete button to remove the parent element (parentElement.remove()).

Step 6: Clear input field after task addition.

4. TEST CASES / VERIFICATION

Test Case	Description / Action	Expected Output	Status
TC-01	Task Addition	New task item added to list on clicking 'Add'	Passed
TC-02	Empty Input Validation	Prevent addition when input field is empty	Passed
TC-03	Toggle Complete	Clicking task text toggles strikethrough styling	Passed
TC-04	Task Deletion	Clicking 'Delete' button immediately removes the task item	Passed

5. LEARNING OUTCOME / RESULT

The Todo List application was successfully implemented and verified, demonstrating dynamic list creation, interactive event handling, and DOM removal.

6. SOURCE CODE

```
<title>Todo List</title>
<style>
body{font-family:Arial;background:#eef2ff;display:flex;justify-content:center;padding:50px}
.box{background:white;padding:30px;width:500px;border-radius:15px;box-shadow:0 5px 15px #aaa}
h2{text-align:center;color:#4f46e5;font-size:28px}
.row{display:flex;gap:10px}
input{flex:1;padding:15px;font-size:18px;border:1px solid #ccc;border-radius:8px}
button{background:#4f46e5;color:white;border:0;padding:15px 20px;font-size:16px;border-radius:8px;cursor:pointer}
ul{padding:0;list-style:none}
li{background:#f1f5f9;margin:10px 0;padding:15px;font-size:18px;border-radius:8px;
display:flex;justify-content:space-between;align-items:center}
.done{text-decoration:line-through;color:#888}
.del{background:#ef4444;padding:8px 12px;font-size:14px}
</style>
</head>

<body>
<div class="box">
<h2>■ Todo List</h2>

<div class="row">
<input id="task" placeholder="Enter task">
<button onclick="addTask()">Add</button>
</div>

<ul id="list"></ul>
</div>

<script>
function addTask(){
  let input=document.getElementById("task");
  let value=input.value.trim();
  if(!value)return;

  let li=document.createElement("li");
  li.innerHTML=`<span onclick="this.classList.toggle('done')">${value}</span>
<button class="del" onclick="this.parentElement.remove()">Delete</button>`;

  document.getElementById("list").appendChild(li);
  input.value="";
}
</script>
</body>
</html>
```
